

## Zendura™ Material Guide

**What makes Aligna Clear Aligners different? It starts with the material.**

**Q: What is Zendura™?**

A premium medical-grade thermoplastic developed specifically for orthodontic aligners. Zendura is strong, clear, and comfortable—ideal for effective, discreet treatment.

**Q: Why does Aligna use Zendura™ instead of other plastics?**

Zendura offers superior crack resistance, consistent force delivery, and excellent clarity. It outperforms many standard thermoplastics in durability, comfort, and aesthetics.

**Q: Is Zendura™ safe?**

Yes. Zendura is BPA-free, biocompatible, and FDA-approved—ensuring safety for long-term intraoral use.

**Q: What are the benefits for patients?**

- Better fit and tracking
- Longer-lasting aligners
- Less chance of breakage
- More comfortable wear
- Virtually invisible

**Q: How do I take care of Zendura™ aligners?**

- Clean daily with lukewarm water and mild soap
- Use a soft brush (no toothpaste)
- Store in your case when not wearing
